# PILE TURNERS:

## EFFICIENCY THROUGH STANDARD AND CUSTOM SOLUTIONS FROM KRIFFT & ZIPSNER

In the folding carton industry, efficient material flow and precise processing are decisive for competitiveness. A key element is the pile turner, which facilitates the handling of paper and cardboard stacks and optimises further processing. **Krifft & Zipsner GmbH** offers standard solutions as well as custom-designed **pile turners** that have been successfully used in the industry for over 30 years.

### Why are Pile Turners Essential in Production?

The use of pile turners in the modern folding carton facility ensure:

- Optimal alignment of materials for the next processing step;
- Improved air circulation for drying or ventilation;
- Reduction of production errors through uniform stacking;
- Ergonomic relief for employees.

### Flexible, Reliable, Future-proof Solutions

The German materials handling specialist offers a range of standard and custom-made machines. Krifft & Zipsner offers both established standard pile turner and custom-made solutions that are precisely tailored to an individual customer requirement. Specific, tailored requests are always welcome and the company is open to customer-specific requirements and implements them competently.

### Everything from a Single Source

From mechanical design and electrical control systems to software programming, all components come from a single source. This ensures:

- Seamless integration;
- High operational reliability;
- Easy maintenance and expansion.

### Modular Expandability

The range of pile turners can also be expanded with intelligent logistics solutions. This includes:

- Automatic pallet removal;
- Pallet dispenser;
- Connection to conveyor technology and warehouse logistics.

This creates a continuous, automated material flow, ideal for modern production environments.

### 30 Years of Experience & 100% Customer Satisfaction

For over three decades, Krifft & Zipsner stands out with its quality, service, and innovative strength. High customer satisfaction speaks for the durability and efficiency of the machines.

For over three decades, Krifft & Zipsner stands out with its quality, service and innovative strength.

Whether standard solution or customised designs – pile turners from Krifft & Zipsner offer maximum flexibility, efficiency, and future security. They are an

indispensable part of modern folding carton production and contribute significantly to process optimisation and production reliability.
